

Science Curriculum Rationale

In Blue Gate Fields Infant School, we strongly believe that Science provides our children with the foundations to understand the world around them. Here we enable and encourage the children to ask lots of questions about what they notice and observe and help them to develop their understanding of scientific ideas by using different types of enquiry to answer their own questions.

Exploration and investigation is a vital part of pupil learning at BGFI, and the teaching and learning of science is done through the use of first hand practical experiences whenever possible.

We aim to inspire and motivate the children to be inquisitive about the world and give them knowledge that leads to critical thinking and to think about how to tackle environmental issues.
